1. SNAILVILLE PROJECT

Snailville Project has been completed on this month. The game is available for download on snailville.eu and any interested party could try to play with Snailville Game. The Game is on various language versions such as English, Dutch, Italian, Spanish, and Greek.

Already, the consortium has made several trials through pilot testing, to ensure that everything works smoothly.

THE GAME

The game design is simple and every player will easily have an access to the game. Specifically, at the first time you will open the game, appears the choose of login. Then you have the opportunity to choose an avatar among 8 characters. In the next step, the game provides you three mentor-characters to select one of them, who will help you with the snail farming. After you choose your mentor, the player transferred in an environment, in which has the option to learn about 10 training modules, that have been developed addressing the different aspects of sustainable snail farming:

- Morfology, anatomy and physiology of land snails
- Where to find snails
- About snails breeding and reproduction
- The selection of foundation stock
- The risks of snail breeding
- Enterpreneurship
- Growing business in Heliculture
- Legislative in Europe about snail farming
- Financial and technical aspects

All these options above, are in disposal and players can select any of them, in order to learn the sector that they are interested in..

The consortium has put a lot of effort in order to deliver a good result and at the same time attract the interest of every player.
