1st Question: What country are you based in?

A total of 30 respondents answered the questionnaire. The origin of the participants was Spain.

2nd Question: What age are you?

The ages of the participants were diverse. However, the majority of the responses came from people between 35 to 44 years old.

- 20% of them were under 25 (blue section).
- 16.7% of them were between 25 and 34 years (red section).
- 23.3% of them were between 35 and 44 years (yellow section).
- 20% of them were between 45 and 54 years (green section).
- 13.3% of them were between 55 and 64 years (purple section).
- 3.3% of them were between 65 and 74 years (blue section).
- 3.3% of them were over 75 years (pink section).

3rd Question: Which of these best describes your situation?

- 10% of the respondents were owners of a snail farm (blue section) and 10% of the respondents were employees of a snail farm (red section). These answers reveal the small number of snail farms in the country.
- 36.7% of the respondents were amateur snail farmers or practiced snail farming as a hobby (yellow section).

- 43,3% of the respondents were considering taking up snail farming (green section). This answer was the most repeated one; this reveals a lot of potential snail breeders in Spain.

4th Question: Do you export what you produce?

- Only 5,9% of the answers were 'yes, I export a significant proportion of what I produce' (red section).
- 29,4% of the respondents answered 'yes, but only a little' (blue section).
- The majority of the participants (64,7%) answered that their production goes entirely to domestic markets (yellow section).

The answers reflect that most of the snails' production remains in the domestic markets and the exports are low.

5th Question: Have you ever attended a training session in snail farming?

- More than 60% of the respondents answered that they had never received any heliciculture training (purple section).
- Then, 13,3% had received heliciculture training organised by an industry body (red section).
- 10% of the answers pointed out having attended a heliciculture training organised by another snail farming business (green section) or online snail farming course based abroad (yellow section).
- None of the participants received university training on snail farming.

6th Question: Do you feel that you have received sufficient guidance on legislation and standards relevant to snail farming?

- 56,7% of the answers reflected that they had received no support or guidance (yellow section).
- 33,3% of the respondents answered that had received guidance, but it was not very helpful (red section).
- Only 10% of the answers said that they had received clear and helpful guidance about this issue (blue section).

7th Question: How useful do you feel it is for a snail farmer have agricultural knowledge and skills?

25 of the 30 responses were 'very helpful' (5 out of 5).

8th Question: Please choose from the issues below what you think are the

greatest barriers to successful snail farming in your country

The issues with more answers were lack of guidance or support (53,3%), insufficient funds or investment (46,7%) and lack of available training (40%).

9th

Question: How much of a factor do you think each of the below topics is in the success of snail farming in your country

- Most of the respondents considered the strong culture of indoor snail farming as a major or significant factor (20/30 responses).
- Most of the respondents considered the strong culture of outdoor snail farming as a moderate factor (11/30 responses).
- Good organic snail farming was perceived as a significant factor (12/30 responses) or a major factor (11/30 responses).
- Support and guidance were pointed out as a major factor by most of the participants (17/30 responses).
- Most of the respondents considered plentiful and good quality trainings as a major factor (14/30 responses).
- Strong demand, national culture of snail consumption was scored as a major factor too (15/30 responses).

- Natural ecosystem and climate was considered as a major factor (13/30 responses) or a significant one (9/30 responses).

10th

Question: Which of these do you feel would be most helpful for a snail farmer like yourself to learn more about?

Most of the participants selected the financial & technical aspects for setting up and operating a snail farm as one of the helpful topics to learn about (70%). The less interesting topic for the participants was the morphology, anatomy and physiology of land snails (only 26.7% of the answers).
